

JABRA PAIRING & RESET MODE

Standard Pairing Method

Reset the Jabra headset by plugging it into its charger for 5 to 10 seconds ONLY. Note that leaving the headset plugged in for more than 10 seconds will only give it a brief charge and will NOT reset it.

A common issue that people have with Jabra headsets is putting them into pairing mode. Make sure that you start with the unit turned off and when you want to put it into pairing mode, press and hold the answer/end button as long as it takes until the blue light comes on and stays on steady (without flashing). This is pairing mode.

Once in pairing mode, your cell phone should be able to add the Jabra headset as a new device from within its Bluetooth menu.

Standard Reset Method

The problem you describe is likely due to a Bluetooth communications error. The way to resolve it is to turn your cell phone off and remove its battery for 10 to 15 seconds. When you put the battery back and turn the phone back on, it should work fine.

I'd also recommend resetting the Jabra headset by plugging it into its charger for 5 to 10 seconds ONLY. Note that leaving the headset plugged in for more than 10 seconds will only give it a brief charge and will NOT reset it.

Pairing with PC

If your PC keeps asking for a device driver, that most probably refers to the Bluetooth adaptor, not the headset. Headsets need no drivers to be paired with the PC, but the Bluetooth adaptors need the drivers to work properly on the PC. If you have a USB Bluetooth adaptor, make sure drivers are installed properly. Also, you can try plugging it to a different USB port.

If your PC has a built in Bluetooth adapter, check the PC's manufacturer website, new drivers should be available for download there.

If your using Windows Vista, have in mind this operating system usually installs drivers for Bluetooth adaptors automatically. I would recommend you to upgrade these drivers with the one provided with the Bluetooth adapter.

To check if headset is working properly, try pairing it with a cell phone. Remember the headset must have a solid blue light indicating the pairing mode before you're able to pair it. If the headset is not in pairing mode will not be detected by the PC or the phone.

Finally, remember the Bluetooth pass code for Jabra products is 0000 (zero zero zero zero).

Hope this information is useful. If you continue having issues with this product, contact us to our tech support line **03-6257 0925**, or contact us back by email: jabrasupport@a-mobile.com.my

The Jabra headset does not require a driver; the device that brings Bluetooth into the PC does. Separate drivers are required for each Bluetooth method of communication, or "profiles". The profiles that the headset uses are HSP and HFP (headset profile and hands-free profile). You would have to make sure that whatever brings Bluetooth communications into your PC supports those profiles and its drivers are properly loaded.

MONO BLUETOOTH HEADSET

JABRA BT2045

JABRA STONE/ STONE 2

Pairing & Reset:

- Remove the Bluetooth® connection to Jabra STONE2 on your phone
- Make sure the headset is charged
- Take the headset out of the portable charging unit
- Press the Answer button for 5 seconds until the Battery & Bluetooth® connection indicator blinking 4 times blue light
- Wait for 3 second then ,press the Answer button for 8 seconds until the Bluetooth® connection indicator blinking blue light

Q&A:

The headset itself can hold a charge for up to two hours of talk time. When not in use or as needed, the headset should be placed in the portable charging unit. This will give you a total of up to 8 hours of talk time before the headset and portable charging unit will need to be plugged into a power source again. If the headset is used until it's drained of power, it will take the portable charging unit two hours to fully charge the headset again. Repeat this charging cycle two additional times for a total of 8 hours / 10hours- (Stone 2 only) of talk time until you will need to plug the Stone back into a power source for recharging.

STEREO BLUETOOTH HEADSET
